

## **Micro Emission and Barnett Technical Services Complete Agreement for Distribution of MH-5000 Portable Elemental Analyzer in North America**

ELK GROVE, CA and NOMI, JAPAN - September 5, 2013 – Micro Emission Ltd., of Nomi, Japan, and Barnett Technical Services (BTS), of Elk Grove, CA, have reached an agreement whereby BTS will be the Exclusive Distributor of Micro Emission's MH-5000 Elemental Analyzer in the United States, Canada, and Mexico.

"Micro Emission is looking forward to be working with Barnett Technical Services in North America," said Tamotsu Yamamoto, President and CEO of Micro Emission Ltd., "The expertise of Barnett Technical Services in chemical analysis will be valuable as we expand our product into the North American market."

"We are excited about working with Micro Emission and distributing the MH-5000 in North America," said Steve Barnett, President of Barnett Technical Services. "The system presents a unique ability to quickly determine the concentration of many elements in solution without the need for large, more complex, and more expensive systems. The potential for doing this work in the field is ground-breaking for environmental applications."

### About Micro Emission

Micro Emission, based at the Japan Advanced Institute of Science and Technology (JAIST) located at the Ishikawa Creation Laboratory in Nomi, Japan, was established to explore small applications that deliver big and bright possibilities. Their main research area is related to the application of microchannels and the development of analytical methods based on liquid electrode plasmas. Their web site may be found at <http://micro-emission.com/index.html>.

### About Barnett Technical Services

Barnett Technical Services, based in Elk Grove, CA, provides services to companies in the materials science, chemical science, and biomedical fields. Specific activities include consulting, training, and product representation for domestic and international companies. Their web site may be found at <http://barnett-technical.com/index.html>.
